Holy Makeover!

The Kimification of Kylie

It started with makeup tips and closet raids – and led to plastic surgery! At just 17, **Kylie Jenner** is slowly but surely morphing into her big sister **Kim Kardashian**

She Arched Her Brows

Kylie Jenner's transformation began innocently enough, with thicker, more defined eyebrows – just like 34-year-old sister Kim Kardashian. "Kylie's once-thin brows are fuller and she widened the arch," says Physicians Formula celebrity makeup artist Joanna Schlip. "The look is similar to Kim's traditional brow style – it's one of Kim's signatures!"

She Stole Her Style

Someone's been raiding Kim's closet! "She lets me borrow everything," brags Kylie, who stepped out in this nearly identical denim-on-denim ensemble on March 31, seven months after Kim wore it. "Kim's my style guru."

She Boosted Her Boobs

Kylie is naturally less curvaceous than her older sis, but that hasn't stopped her from showing off – or amping up – her assets. "It appears she had a breast augmentation," NYC-based plastic surgeon Dr. Norman Rowe tells *In Touch*. "She's gone from a B-cup to a DD-cup. They're a little too big for her." Kylie has reportedly denied getting breast implants.

She Plumped Her Lips

One of the most dramatic – and talked about – changes occurred in early 2014, when Kylie's pout swelled up like her sister's. Though she repeatedly insisted her look was the result of expertly applied lip liner, she finally admitted the truth in a May episode of *Keeping Up With the Kardashians*: "I have temporary fillers." Kim's lips are still suspiciously plump – but sealed!

She Got More Junk in the Trunk

The final step in Kylie's metamorphosis? A larger behind, of course! When the budding model posted this exaggerated booty photo, fans called her "fake" and "Kim K. Junior." Though Philadelphia area-based plastic surgeon Dr. Lyle Back blames padding for the extra junk in Kylie's trunk, he believes it's only a matter of time: "Butt implants are coming!" he says.
